

RELEASE

With “West Franklin” and “ElginB”, Rosetti Marino is making another step forward in the North Sea.

Rosetti Marino SpA, listed on the MAC - Alternative Capital Market of the Italian Stock Exchange (LSE Group) - hereby informs that it has recently acquired, from **ELF EXPLORATION UK LTD** / TOTAL Group (as Operator of a Consortium composed of Gaz de France, British Gas, Eni, E.ON, Esso, Chevron, Dyas and Summit Petroleum), two contracts with a total value above 200 million GBP (British pounds) for production of the Topsides for the West Franklin and Elgin B platforms.

The contracts cover the activities of Engineering, Procurement, Construction, Installation, Hook-up and Commissioning of the two platforms, to be installed in the West Franklin and Elgin field located approximately 240 Km East of the Scottish city of Aberdeen, in the Central Graben Area (CGA) of the UK sector of the North Sea.

These two topsides, of approx. 6,000 tonnes, will be used in the extraction of gas and condensates, respectively, with 9 and 12 high-pressure and high-temperature wellheads, the production design rate of West Franklin platform being 40,000 and Elgin B platform 65,000 barrels of oil equivalent per day.

These two contracts attest Rosetti Marino reliability and ability to gain market share even in a extremely competitive environment as the North Sea UK Sector.

Once again a leading IOC (International Oil Company) as TOTAL has renewed his trust to the Ravenna-based firm entrusting to Rosetti one of the most important development in the area.

Ravenna, 14 September 2011
